

SAMPLE COLLECTION

At Domfesa we have developed a series of industrial process control systems for sampling with CE marking.

Innovative, control and quality. Where user intervention is minimal and the interruption in the manufacturing processes where the samples are taken is null.

The study and control of quality is fundamental in industry, which is why our R&D department has designed a series of sampling systems that guarantee healthy and precise conditions at all times. Adaptable to any machine that conforms the line of action where you want to install these control devices.

This equipment also includes a set of pneumatic-mechanical elements that provide continuous spatio-temporal functionality in all manufacturing processes. In other words, it is not necessary to stop or block any process or manufacturing line to control production.

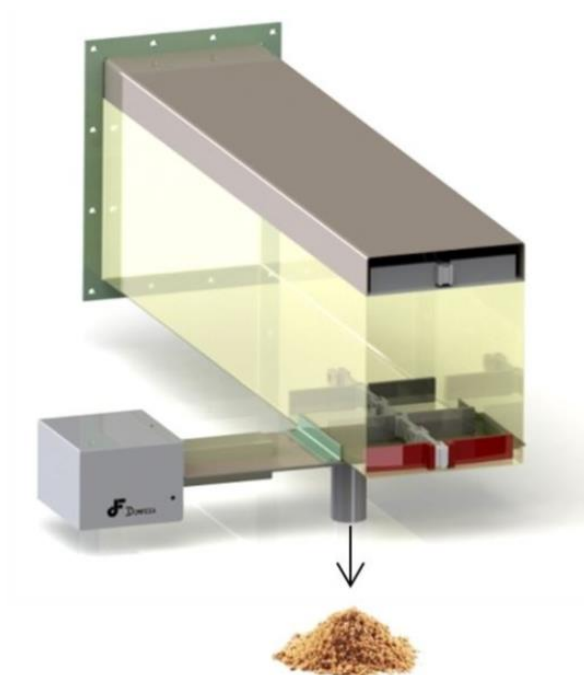

HELICAL FOR HOPPERS, SILOS AND BINS:

VERTICAL THREADS - PNEUMATIC SYSTEM:

CHAIN CONVEYORS - BELT CONVEYORS:

HORIZONTAL HELICAL THREADS:
